

OMFB spa new milestone: ISO 14001 certification

Since 1992, OMFB spa is compliant to ISO 9001 which certifies the advanced quality control and continuous improvement of processes to manufacture reliable and effective products.

In 2012 the company obtained the ISO/TS 16949 and finally, in 2018, the prestigious IATF 16949 (International Automotive Task Force) certification, specific for automotive components producers.

Today we proudly announce that OMFB spa is also ISO 14001 certified.

This highlights our efforts and dedication to reduce environmental impacts and build stakeholder trust by ensuring sustainable operations.

Our environmental management system meets legal requirement and our own moral principles.
